

# CALL FOR PROPOSAL FOR THEMATIC PROGRAMS

**Deadline 14th November 2025**

For advances in your research field, this call for programs allows you to gather national and international colleagues working on related topics.

**Institut Pascal offers:**

**FUNDING**

for accomodation, catering and travels

**FACILITIES**

amphitheatres, offices, meeting rooms

**SUPPORT**

for all the administrative tasks

This Call is

**OPEN TO DIFFERENT  
SCIENTIFIC DISCIPLINES**

**FOR PROGRAMS OF A MEDIUM/LONG  
DURATION**

**MEANT TO FAVOR BRAINSTORMING  
AMONG PARTICIPANTS**

**BORN IN 2019**

**11 PROGRAMS  
IN 2024**

**AROUND 1000  
PARTICIPANTS  
EACH YEAR**

**For more information, please visit our website**

**<http://www.universite-paris-saclay.fr/institut-pascal/>**

# Call for Proposals 2025

## Scientific programs 2027/2028

### Objective

Institut Pascal (IPa) promotes thematic programs to bring scientific communities together and help them explore pioneering ideas and establish new collaborations. IPa welcomes programs mainly related to the scientific fields covered by Université Paris-Saclay from Mathematics to Life Sciences, be they theoretical or experimental.

IPa intends to facilitate and accelerate the selected projects by:

- Financing accommodation, on-site catering, and part of travel costs
- Providing rooms and space for meetings in its brand new facility with 2 amphitheatres, meeting rooms equipped for videoconferencing or distant collaborative work and 26 offices to host up to 60 visitors in excellent conditions
- Offering support from the IPa team for the budget and registration management, the booking of accommodation, the organization of meetings and social events, and the management of mission fees.

The spirit of the IPa initiative is to host programs of long duration (typically 2-3 weeks, up to 6 weeks), allowing researchers to devote the necessary time and energy to particularly challenging topics. These programs should favor brainstorming sessions that lead to innovative advancements.

### Funding

The standard financial support that IPa provides to the selected programs is the following:

- Accommodation costs
- Coffee breaks
- Weekday lunches, including one buffet per week
- 1 Social dinner per week
- 1 Happy hour per week
- Up to 4000€ in travel expenses if needed, and favoring participants staying for at least 2 weeks.

Institut Pascal highly encourages scientific organizers to explore additional sources of funding as well. The amount of these expected additional funds should be included in the proposal.

**Self-funded programs can also be proposed.** In this case, a weekly contribution of 1500€ to 2500€ will be requested to cover the logistical and organizational support. This amount depends on the degree of support needed by the organizers.

### Requirements

Programs held at Institut Pascal should dedicate a large portion of their time to interactions between small to medium-size groups of researchers, unlike the usual congresses which mainly consist of scientific presentations.

The program's local organizing committee should include at least one scientist from Université Paris-Saclay to ensure that the research done at the University, in the scientific field of the program, is involved.

Gender balance in the design of the program (organizing committee, key speakers and participants) should be representative of the field of study and is one of the selection criteria. Engaging young scientists into a program is very much encouraged.

The program organizers should indicate in the proposal how they envision to share its outcomes (extended summary, white paper, ...). The institute has created a new publication with a publisher EDP-Sciences: Les Cahiers de l'Institut Pascal, <https://cahiers-ipa.publications.universite-paris-saclay.fr/> where these outcomes can be widely shared.

Program organizers are requested to consider the IPa up-to-date videoconferencing equipment in their proposal, preferably inviting on site participants for at least 2 weeks<sup>1</sup>. However, this condition could be difficult in some disciplines; if so this should be discussed with the board of IPa before submitting a proposal and explained in the proposal. Coordinators are asked to consider organizing a colloquium or general-public conferences, for which IPa can provide organizational and advertising support.

<sup>1</sup> If a pandemic situation imposes limitations to travel in the coming years, we would ask the organizers to conduct the program in a hybrid format using the videoconferencing equipment.

### Application Details

The application is composed of the **program proposal AND the summary sheet duly filled** (see annex 1 next page). The program proposal (5 pages max) should provide the following information:

- Title of the program and abbreviated title
- List of the scientific organizers, co-organizers and scientific committee. **Please note that the breadth of the topic or/and its inter-disciplinary aspect should be reflected in the choice of the scientific organizers coming from different sub-fields/fields.** To optimize the interaction with Institut Pascal staff, we encourage a local organizing committee to be composed of 2 to 4 persons that cut across the different disciplines of the program.
- Description of the program, including a brief description of the field for non-experts, and a list of important questions to be addressed (1 page max).
- List of the envisaged key speakers.
- Structure of the schedule on a week-by-week basis: slots for seminars, lectures, tutorials, brainstorming sessions etc.
- The expected participation *per week* including the organizers and the estimated ratio of participants requesting accommodation. For any program, the number of participants should range between a minimum of 15 and a maximum of 60. For an optimal use of the IPa facility, programs with less than 30 participants (enabling the simultaneous running of 2 programs) or above 40 will be favored. Specify if the program is expected to be held fully on-site or in an on-site/remote hybrid mode and how flexible is the proposed organization in case of reinstatement of travel restrictions.
- Initiatives with regards to students (workshops, schools, seminars) and the broader public.
- Additional funding opportunities (requested or obtained). Although not required, co-financing is recommended as it allows for the selection of a greater number of programs.
- Exceptions to the “2-week minimal stay” rule, and rationale.
- A mention of how the equipment for videoconferencing and collaborative work will be used during the program, if needed.
- Desired start and end dates (**within 2027 or 2028**).
- Suggestions for referees

### Selection

Based on the evaluation by external referees, the IPa Scientific Council, consisting of internationally recognized scientists, will select the program proposals based on:

- Scientific importance of the topic, timeliness, intellectual challenges
- Recognized leadership of the program organizers and participants
- Overlap with the research activities carried out in Paris-Saclay
- Gender balance in the design of the program
- Expected deliverables at the end of the program (which could be in the form of a white paper).

Once a program has been accepted by the Scientific Council, the IPa board and the scientific organizers work together towards its implementation.

## **DEADLINE: 14 NOVEMBER 2025**

It is strongly recommended that organizers submit a first draft of their proposal by 20 October, 2025. The IPa board will then offer feedback at an early stage to improve the proposed program and increase its chances of being selected.

Interview and selection by the Scientific Council will take place in Feb./March 2026.

Proposal should be sent in single PDF-format to:

[institut-pascal@universite-paris-saclay.fr](mailto:institut-pascal@universite-paris-saclay.fr)

# Call for Proposals 2025

## Annex 1 – Summary Sheet

Program's title	
Acronym	
Scientific Domain	
Names, affiliations and email addresses of the scientific organizers	
Program's duration (number of weeks)	
Preferred year (2027 or 2028)	
Preferred period of the year	
Total number of participants envisaged for the program (organizers included)	
Number of participants per week (organizers included)	
Estimated number of participants requesting accommodation	
Co-funding (name of institution and expected amount). Indicate whether obtained or expected.
